

Beginning Drawing Class - Online Homework Assignment, 2-Point Perspective Invented Interior

Project Description:

Draw an invented 2-point perspective room.

Begin by watching the Vimeo drawing demonstration below: (enter the class password)

2-point perspective invented interior demo:

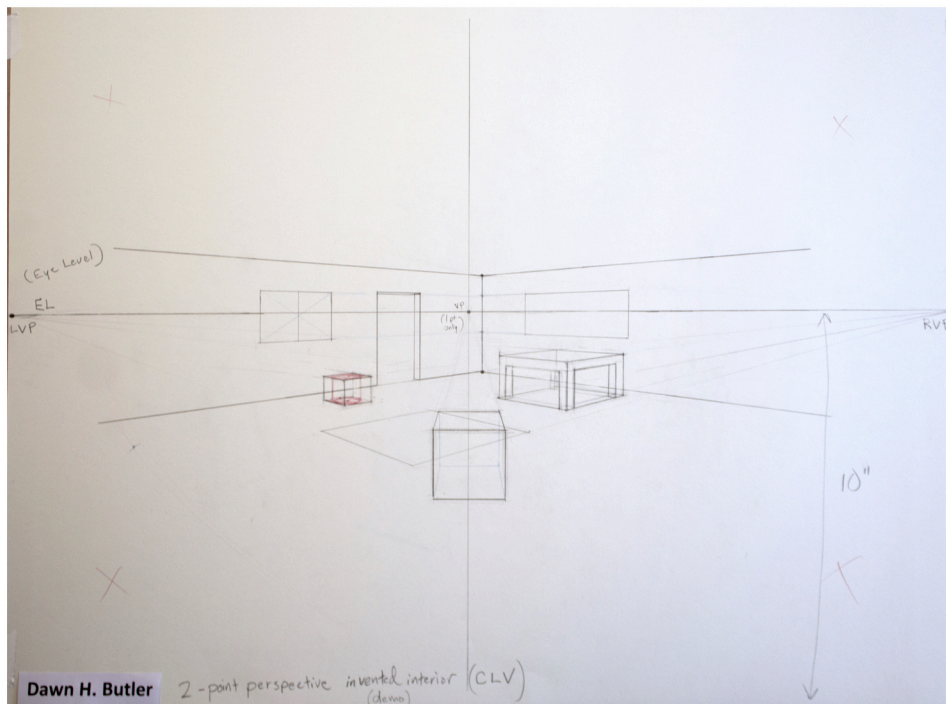

<https://vimeo.com/400699444>

Materials: 18"x 24" drawing paper, HB graphite pencil OR mechanical graphite pencil, 18" ruler,
Optional: colored pencil

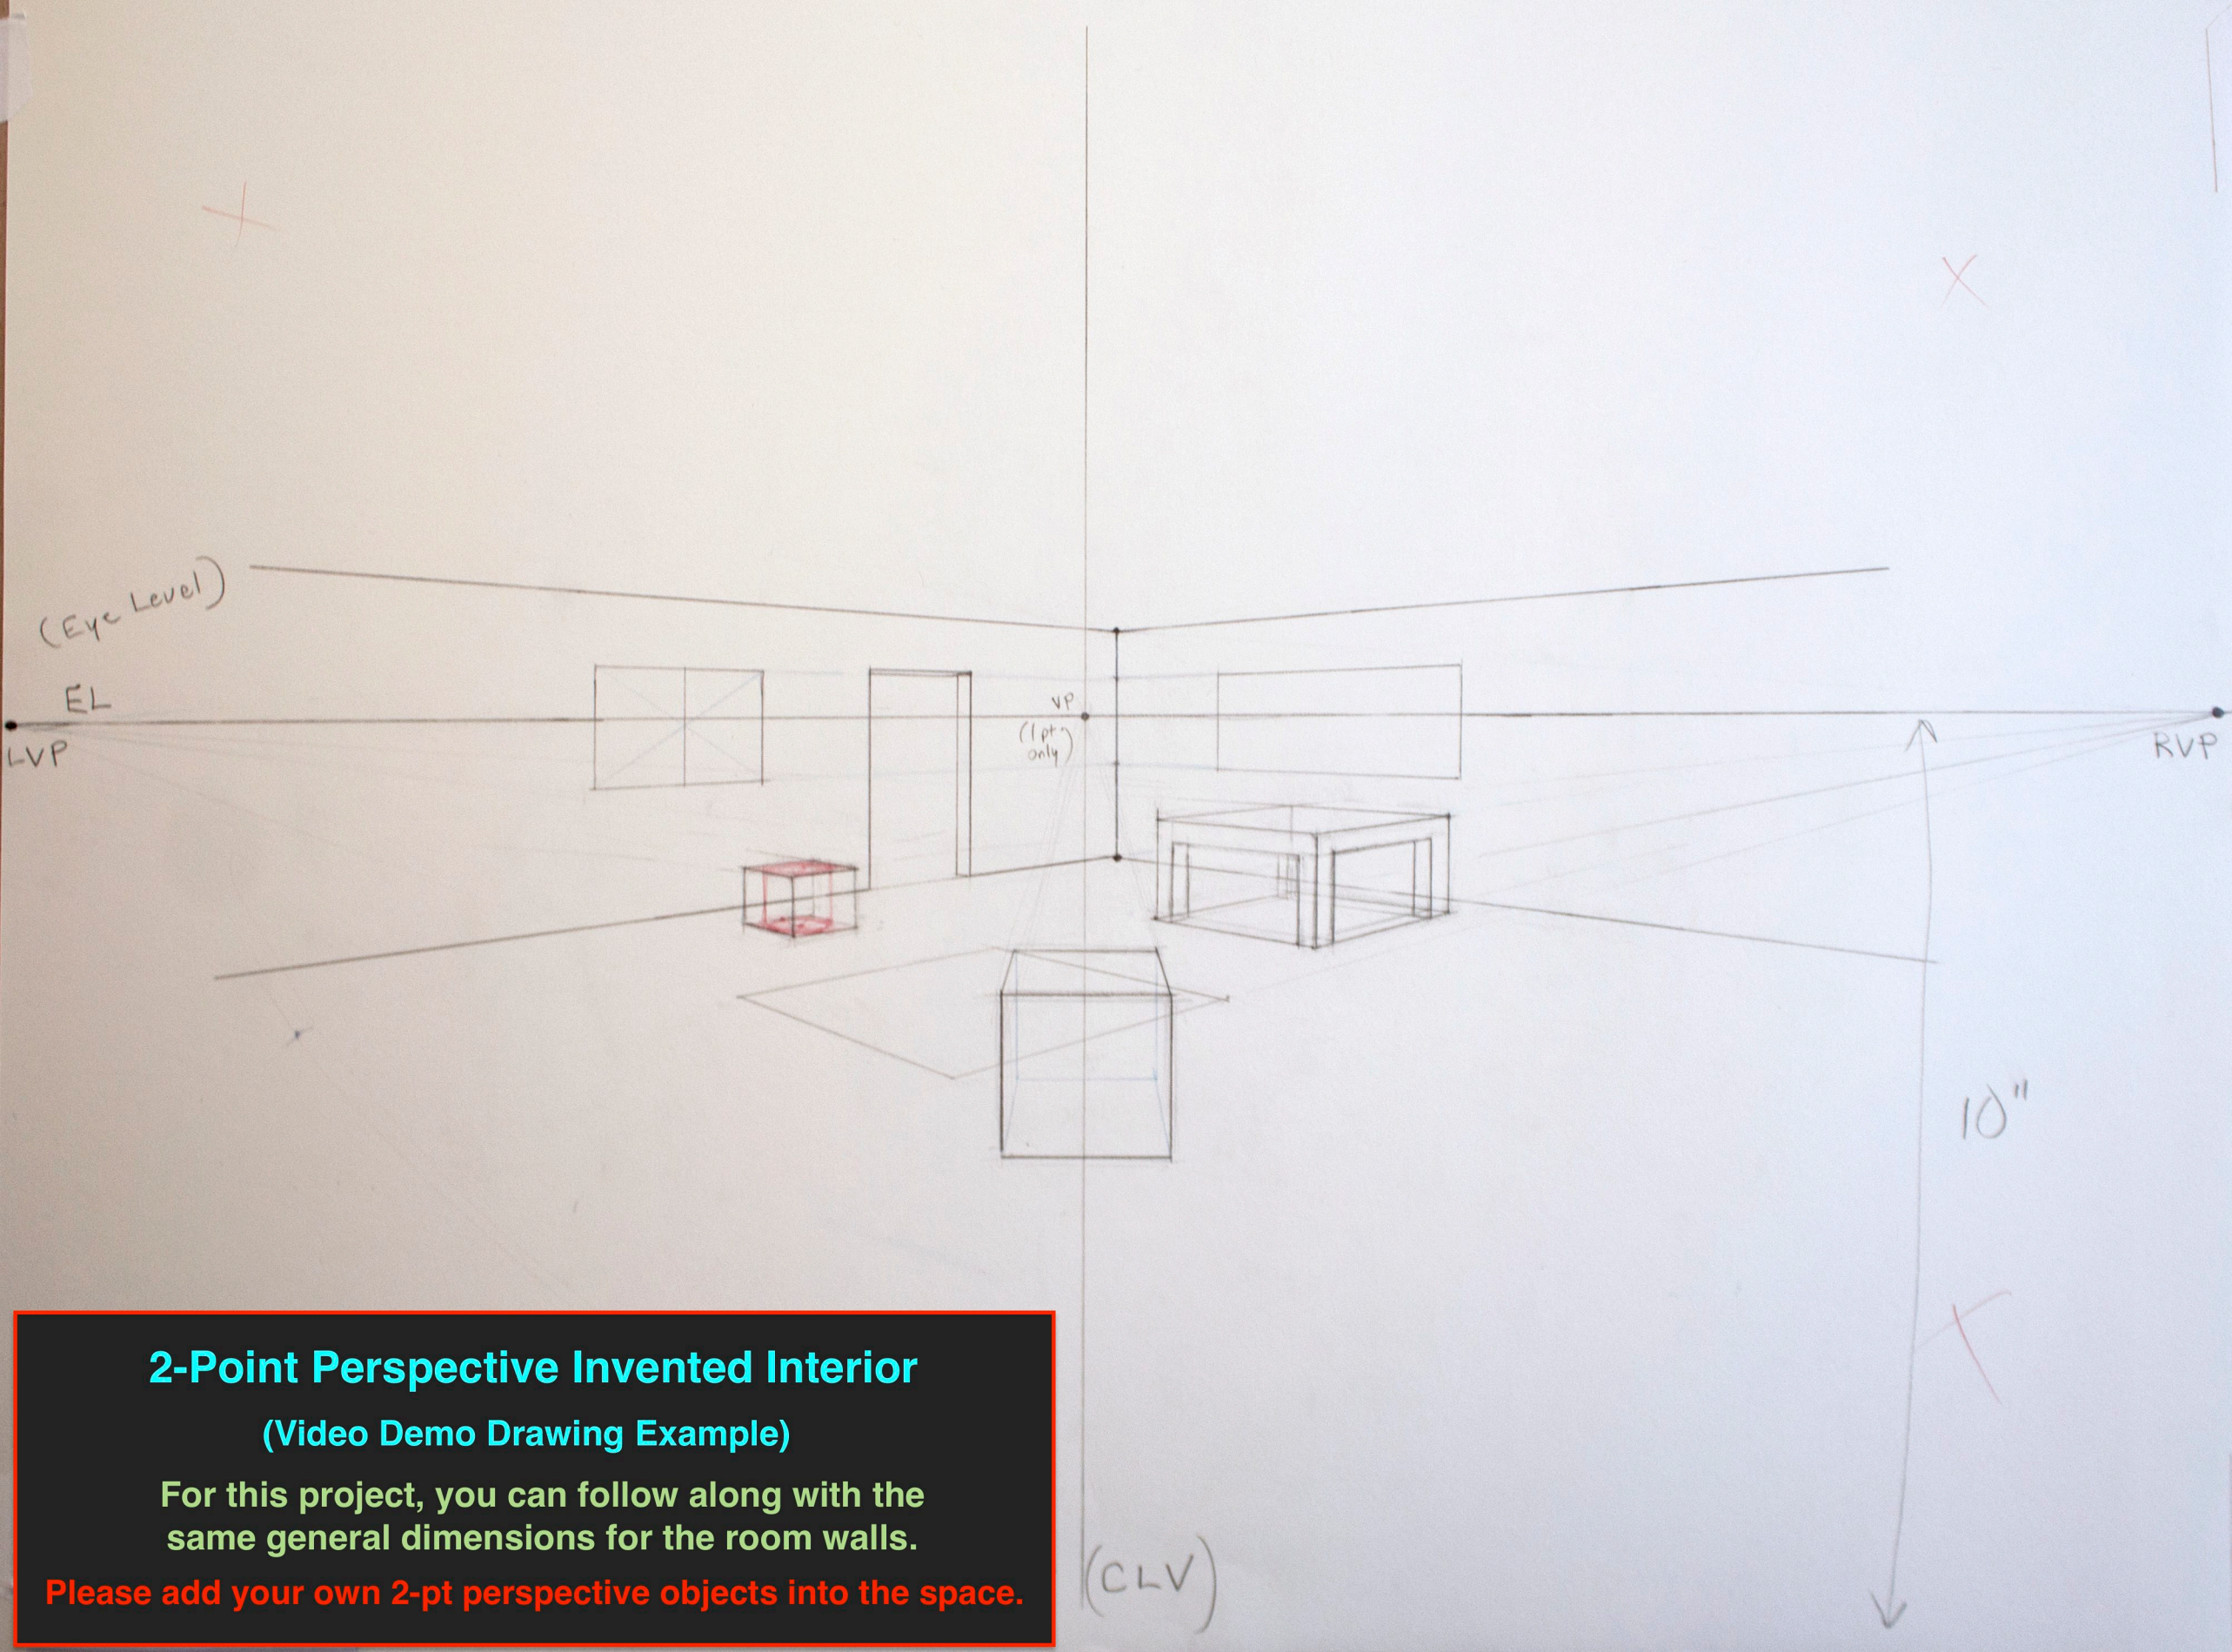

Project Details:

As you are following along with the video demonstration, draw an invented 2-point perspective interior. Work in a horizontal format and place your eye level 10" above the bottom of your drawing paper. Make sure to label your eye level and your vanishing points. Place your VP's as far apart as you can on your eye level. (Make sure that the vertical line describing the corner of your room, is no taller than 2.5 or 3". Add a few simple objects into the room, keeping them all in 2-point perspective. (If you want to add an object in 1-point perspective, establish your center line of vision first.)

Project Objectives: To learn the basics of 2-Point Perspective.

(A higher resolution image example of this project will be emailed to you.)

2-Point Perspective Invented Interior

(Video Demo Drawing Example)

For this project, you can follow along with the same general dimensions for the room walls.

Please add your own 2-pt perspective objects into the space.
